PALTRACK BECOMES EGIS PARTNER FOR THE PAPERTRAIL ECM SOLUTION IN TRADITIONAL FRUIT MARKET AND THE IMPERIAL GROUP

The IMPERIAL operating company, Paltrack (Pty) Ltd, has signed an OEM agreement with EGIS for their PaperTrail Enterprise Content Management (ECM) solution. This agreement was originally put in place to extend Paltrack's offering into its traditional market i.e. the SA fruit export industry. ECM adoption in the IMPERIAL group is gaining momentum and Paltrack is positioned to support IMPERIAL companies and EGIS in this initiative.

Leading organisations throughout the world recognise the need for a robust, reliable and flexible software solution that will automatically store, manage and ensure secure sharing of documents across the distributed enterprise.

The successful implementation of this type of document management solution is paramount to the streamlining of information flow and processes.

About Paltrack:

Paltrack (Pty) Ltd creates information technology solutions and provide these solutions to the fruit industry under license agreements. It is a wholly South African owned company with majority shareholder, the IMPERIAL group. Paltrack is the leading supplier of information systems and related services to the South African fruit export industry. A number of ancillary services have been established to compliment the software solutions. These services are mainly related to information provision and setting of standards to ease information exchange. See www.paltrack.co.za for more information.

About EGIS:

Egis Software and Distribution, a member of the Switchboard group of companies, was established in August 1993. The company's main focus is centred around document and content management solutions development with the core solution being the highly successful PaperTrail ECM. See www.egis-software.com or more information.

For further details, please contact Jeanette Jenkins at Paltrack on +27 21 970 2777 or e-mail jeanette@paltrack.co.za

enterprise content management

PaperTrail addresses all aspects of document management - from imaging and electronic forms to workflow document versioning, revision control and increased efficiency through approval processing and electronic signatures. It has established itself as the preferred, complete document management solution in the South African market.

PaperTrail is suitable for both medium and large distributed enterprises, where factors including speed, ease of use and security are key.

PaperTrail is a web-based application requiring no client software, simplifying deployment and version control.

PaperTrail encompasses the 5 key areas of EDMS, namely:

- Electronic document warehousing (central storage)
- Knowledge management (collaboration and workflow)
- Electronic form control (intelligent, dynamic form management)
- Content management (native file management and revision)
- Approval Processing
